# EXCLUSIVELY MANUFACTURED BY FAMILY COMPANY

We are a small croatian family business that handpicks natural organic plants with a lot of heart and sweat ,we still have three generations working together on the fields and mechanical strengthening is still undesirable ,we harvest most of the medicinal plants directly from the islands because there are excellent climatic conditions and everything grows in full nature on an organic basis ,after the daily harvest the medicinal plants are then immediately distilled to produce essential bio oils and organic hydrolate .

Our small family business harvests and distills only on order so that our medicinal plants can thrive and develop as long as possible in the wild nature, therefore our production quantities of oils and hydrolates as well as tonics and pure facial waters are limited.

Our partners are the University of Applied Sciences in Knin, which controls and monitors our products, and the Croatian Ministry of Health, which analyzes us according to EU regulations and the strictest controls and rules, and issues certificates for our export and marketing.

We also offer organic olive oil from our own production, we own a small but high class and latest method Tuscan Olio Mio cold press olive oil plant that presses 200kg per hour, this high quality olive oil we also offer annually (max.1000 liters) for sale.

Among our services we also offer drilling up to 250 meters deep to pump drinking water from the ground, especially on our islands, these works are vital in our country.

Equally important are our services in the field of electricity, we offer sales and installation of solar panels, most of the islands are still without electricity and water supply, so our assistance has become vital.

I hope that I have given you a small insight of our production and marketing in our small family business. We would be honored to do business with you in the future.

With kind regards,  
Marino Vuksan  
(Owner & CEO)
